

## THE E-BIKE AND E-SCOOTER SCHEME

### WHAT YOU NEED TO KNOW

St John's Innovation Park is committed to working towards a most sustainable environment. The introduction of e-bikes and e-scooters at the Park is one of the ways in which we aim to encourage occupiers to consider more sustainable transport methods, leading ultimately to less reliance on petrol/diesel cars.

The Park is part of a scheme running throughout Cambridge that, based on a forecasted 12-16% car replacement rate and standard utilisation rates, expects to save 48-115 tonnes CO2 eq. in Cambridge over the course of the next 12 months.

**The roll out of the e-bikes and e-scooters is targeted for the beginning of April 2021.**

### HOW DO I ACCESS AN E-BIKE OR E-SCOOTER?

It's really easy...simply download the VOI App from wherever you download your apps to get started. Regular users can subscribe to a variety of packages offering discounted rates and rewards from the VOI App.

### ONCE YOU ARE READY TO GO:

- Locate an e-scooter or e-bike from one of the bike shelters across St John's Innovation Park.
- Use the VOI App to unlock your scooter or bike. E-scooters and e-bikes can be unlocked for £1 and cost 0.20p per minute between 0600hrs and 2000hrs.

### COVID-SAFETY:

- The e-scooters and e-bikes are disinfected regularly with high quality anti-viral cleansing agents that lasts up to 24 hours.
